### END OF YEAR TIPS FROM YOUR GLOBAL HEALTH PHARMACIST

As the days keep getting shorter, does it feel as though there are fewer than 24 hours in a day? With the holidays right on the horizon, there's so much to think about and so much to do. Here are a few end-of-year reminders to make sure your health – and your pocketbook – doesn't get the short end of the stick.

#### **GET YOUR FLU SHOT**

If you're like many people, getting a flu vaccination can easily slip your mind. But a flu shot is too important to get bumped to the bottom of your priority list. Every flu season is different, and every person respond to the flu in a different way. The flu can lead to hospitalizations and even death. The Flu season often begins in October, so there's no better time than the present.

#### **PLAN FOR MEDICARE OPEN ENROLLMENT**

Every year, the open enrollment for Medicare is October 15 through December 7. This is when you can change your health plan and prescription drug coverage. You can get more information here: Call 1-800-MEDICARE or go to [www.medicare.gov](http://www.medicare.gov). You'll find a wealth of resources to help you compare hospitals, doctors, drug plans, and other health care services. But if you need more help making comparisons and choices, your Global Health Pharmacist can help. Just ask.

#### **SWITCH TO GENERICS?**

Generic medications are AB rated by the FDA. That means they should be identical to brand-name drugs in dosage, form, safety, strength, route of administrations, quality, performance traits, and intended use. In actuality, this may not be the case. And not all medications have a generic equivalent for a brand-name drug. For sure, the main difference between a generic drug and a brand-name drug is price. Generic drugs are considered to be less expensive than brand-name drugs. One way to find out is to go to Drugs@FDA, or to talk to your Global Health Pharmacist.

## USE OR LOSE IT

Do you have a flexible spending account (FSA)? This is a special account you put money into to pay certain out-of-pocket health costs. That might include co-payments, deductible, drugs, and other health care costs. Limited to \$2,550.00 each year, this money is not taxable.

If you have an FSA, now is the time to use up your health benefit dollars – or you'll lose them! Schedule eye or medical checkups before the end of the year. Some employers make allowances, though. So check to see if you have a grace period for using up the money or if you can carry over a limited amount of funds to the next year.

## SCHEDULE A "TUNE-UP"

Why not schedule a meeting with your Global Health Pharmacist to see if your medications are working as well as they can for you? We can help you come up with ways to remember to take your drugs and to order refills – before you run out. Not happy with your drug/s side effects? Both your doctor and your Global Health Pharmacist can work with you to adjust your dose or to find a substitute. There's no need for you to suffer in silence.

*Nothing herein constitutes medical advice, diagnosis or treatment, or is a substitute for professional advice. You should always seek the advice of your physician or other medical professional if you have questions or concerns about a medical condition*
